Engineer

Our Purpose

Make FreeBSD the best platform for research, products, computing, education, and more.

What We Support

Software Development/OS Improvements

Release Engineering / FreeBSD Infrastructure

Technical Leadership

Advocacy and Education

Legal – Core Team and FreeBSD IP

Face-to-Face Meetings and Summits

Highlights for 2017

Current external software development projects:

- ZFS improvements
- Broadcom wifi infrastructural improvements (bhnd driver)
- Headless mode out of the box – Beaglebone Black
- Extending bhyve-ARMv7 Features
- Porting bhyve-arm on an ARMv8 Platform

Highlights for 2017

Current internal software development work (Ed, Kostik, and interns)

- New Intel server support
- kqueue updates
- 64-bit inodes
- stack guard
- kernel ubsan
- tool chain projects
- i915 driver investigation
- NVDIMM support in acpiconf
- continuous integration dashboard (web page and physical device)
- FAT filesystem support in makefs

Highlights for 2017

FreeBSD Advocacy

- National FreeBSD Day - June 19
- Presenting at and attending more non-BSD conferences and in new regions like India, Singapore, and China
- FreeBSD Journal

Training / Education

University of Waterloo Co-op program – 2 interns every four months

10.4 and 11.1 release

pkgbase effort

Partner Benefits Program
